

It's Dental Month at Circle L!
**Does Your Pet
Have Bad Breath?**

Pets don't have options like porcelain veneers or doggie dentures so it is up to their humans to make sure their teeth are taken care of. Just like us regular teeth cleaning, brushing and mouth wash can help prevent dental disease. Tartar and irritated gums can be the gateway for bacteria to enter your pet's blood stream and cause issues like damage to the liver, kidney's and heart. During the months of February and November **Circle L Animal Hospital offers a 15% savings on your pets dental cleaning.** Let us take care of the tartar and the bad breath and then we will teach you how to care for your pet's teeth at home with tools like a toothbrush and treats!

15% OFF
